Please Help Us Save the Snow Roller

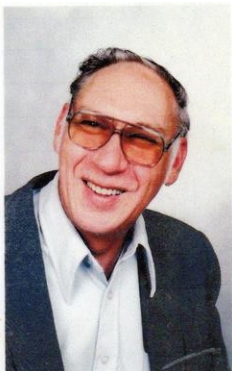

Snow roller used on the roads
in West Brookfield in olden times

Snow roller in the shelter in very poor
condition at the Marvin Newton House

The BHS is fortunate to have on display on Ridge Road the last known surviving snow roller that was used many years ago to pack down our town's snow covered roads before the advent of engine-driven snow plows. Unfortunately its shelter is in a state of severe disrepair and needs to be replaced. The BHS Board of Trustees has determined that this repair will take at least \$3,000 dollars to complete the work. We are now soliciting funds for this effort and hope you and other community members can help get this project completed before another winter arrives. Please consider donating today!

The Brookfield Historical Society is raising funds for the snow roller shelter repairs in memory of our recently departed Board of Trustee member A. Roy MacAskill. "Roy" served as a loyal and contributing member of the BHS Board for many, many years. Prior to his death he was very active in the Board discussions about the urgent need for the shelter's repairs. If you can help in this effort please send your tax deductible contributions to the Roy MacAskill Memorial Fund ,c/o Brookfield Historical Society, P.O. Box 447, Brookfield, VT 05036
